

MINUS CUSTOM MATERIALS

The Minus Series fixtures are intended for drywall installation, but are designed to allow installation in a variety of different materials. As with any custom installation, there are limitations. To determine if an installation within your desired material is possible, please fill out the questionnaire below and return it to your authorized Minus reseller for consideration and direct to: info@apurelighting.com. Custom drawings may take 7-10 business days from the date of submission to Apure.

All fields are required to be completed in detail. Supporting documents are encouraged, but do not substitute as answers.

Fixture Location 1. What fixture are you planning on installing? (circle one) Minus 1 2 3 4 5 Nano 2. Where are you planning on installing this fixture? (circle one) Interior Exterior 2. Where are you planning on installing this fixture? (circle one) Open Closed Open Open	Project ID:		
3. If you selected exterior for question 2, is the structure open or closed? (circle one) 4. Is the ceiling a plenum/air return ceiling? (circle one) Yes No Material 5. What material are you planning to install the fixture in? 6. Does the desired material have any certifications/listings? (circle one) 7. What is the total thickness of the desired material? (complete in detail) 8. Does the ceiling or wall material have additional backing material? (circle one) Yes No Installation Safety 9. Can your installer route and/or cut the material according to shop drawings? (circle one) Yes No 10. Will the fixture have a one foot clearance below the fixture aperture? (circle one) Yes No 11. I understand Minus Series fixtures are not suitable for installation within steam rooms or saunas. Initials: 12. Does this installation require an IP66 rating? (available only for the Minus 1) 3. What is the target installation date? 14. How many fixture's require this special installation? Acknowledgment L understand that the Minus is a certified low voltage class 2 fixture and that I am fully responsible to conform to all NEC codes and all local codes when installing in the desired special material.
